PROJECTS

• PDFBot (RAG Implementation)

PDFBot is an intelligent automation tool designed to handle PDFrelated tasks such as merging, splitting, compressing, converting, and extracting text using OCR.

• Spotify Clone (Basic Web Development)

Spotify Clone is a music streaming web application that replicates the core functionality of Spotify. It enables users to browse songs, create playlists, play/pause music, and explore artists and albums.

• Password Manager (MongoDB Implementation)

The Password Manager is a secure web or desktop application designed to store and manage user passwords in MongoDB.

• E-Commerce Website (Node.js Framework)

EcoBloom is a sustainability-focused website that promotes plants and thier products. It is designed with the help of Next.js and Auth.js Framework.

• MULTIMODAL SUMMARIATION AND TRANSLATION SYSTEM (AGENTIC AI – FINAL YEAR PROJECT)

The **Multimodal Summarization and Translation System** is an AI-based application that processes text, audio, and video inputs to generate concise summaries and translated outputs. The system uses OpenAI Whisper for speech-to-text conversion and BART for intelligent text summarization. It provides a user-friendly interface using Streamlit and supports multilingual translation for better accessibility.
